

CONSTRUCTION NOTICE

Highland Road Water Main Replacement Project

July 15, 2016

The City of Highland Heights has awarded a contract for the replacement of the water main on Highland Road to Frabrizi Trucking and Paving of Middleburg Heights, Ohio. The project will involve the removal and replacement of a sixteen inch water main which serves homes and businesses along Highland Road as well as adjacent sub-divisions. The city was successful in obtaining approximately 74% of the funding for the \$3.3 million dollar project by way of a grant and a zero interest loan through the Ohio Public Works Commission.

The project will be broken into five phases:

- Highland Road/Bishop Road Intersection
- Highland Road/Miner Road Intersection
- Richmond Heights border to Bishop Road
- Bishop Road to Miner Road
- Miner Road to I-271

The contractor will begin work at the Highland Road/Bishop Road intersection on **Monday July 25, 2016**. Work will then progress to the Highland Road/Miner Road intersection and will continue accordingly. The entire project will take place over two construction seasons with completion in 2017. The project will be suspended during winter months and work will resume next spring.

A majority of the water main is located beneath the berm in the westbound lane which is where the construction will take place. During the course of the project, alternating two-way traffic will be maintained in the eastbound lane with the use of flaggers during the day and temporary traffic signals at night and on weekends. Motorists should anticipate delays and are encouraged to seek alternate routes. Police personnel will be assisting with traffic maintenance at intersections when needed.

The contractor will construct temporary water mains which will serve residents and businesses during construction. Residents and businesses will be notified in advance when work is anticipated to disrupt use of their driveways and/or water service.

We thank you in advance for your patience and understanding as we work to complete this very important project. The replacement water main will enhance the reliability of water service to a large portion of our community for many decades to come. If you have any questions or concerns, please contact the office of the City Engineer or the Service Department at the following numbers:
